

Double Protection

Our Computer Sanitizer & Cleaner 19-20 is formulated with 99% Alcohol and Benzalkonium Chloride offering double protection which is achieved by the initial and immediate alcohol action followed by the residual anti-microbial properties of the Benzalkonium Chloride once the alcohol has evaporated.

Fast acting

Immediately effective and extremely fast evaporating.

Safe

Non-Toxic, Non-Corrosive, Non-Staining, Non-Irritant, Non-Carcinogenic and Biodegradable. Contains no Phenol, Chlorine or Aldehyde. Non-water formulation protects sensitive electronics from any possibility of water damage.

Wipe free

Our Computer Sanitizer & Cleaner is a leave-on spray application, it is not necessary to wipe down or rinse items after sanitizing.

Residual action

Contains residual chemistry that continue to protect the surface after the alcohol has evaporated.

Non gel consistency

This ensures that the surface is smear free and does not build up a water sensitive "layer" of the gel component.

Non sticky

The sanitized surfaces remain clean and tack free which stops dirt and dust pick-up on the cleaned surfaces.

Synergistic action

The synergistic combination of the 99% Isopropyl Alcohol content and the residual Benzalkonium Chloride gives an effective and lasting anti-microbial protection.

Active Ingredients & Purpose

99% IPA, 0.2% Benzalkonium Chloride.
Antiseptic spray with residual anti-microbial action.

Ingredients

IPA, Benzalkonium Chloride.

Uses

Spray on formula, that sanitizes high-touch electronic and digital surfaces. Such as mobile phones, remote controls, monitors, screens, keyboards, touchpads etc. to eradicate or control microbial activity

Do not use

On face or in eyes, or on open wounds and cuts.
Never use near naked flame.

Warnings

Keep out of reach of children.
Do not swallow or ingest.
For external spray application only, do not immerse items.
If swallowed, get medical help or contact a poison information center immediately.
Flammable - keep away from naked flame.

When using this product

If in the eyes, rinse promptly and thoroughly with water.

Directions

Spray onto computer/electronic surface you need to sanitize. Wipe with a clean lint free cloth if desired.

Other information

This product does not contain any water which is detrimental to all electronic devices and equipment.

Understanding the vectors of microbial contamination will help you to determine which surfaces need to be sanitized regularly. All objects and surfaces that come into direct contact with hands such as digital devices, furniture, doors, windows, packages, handbags, laptop bags, keys, writing equipment, etc need to be frequently sanitized. Simply, if you've touched it, then sanitize it.

Airborne contamination is less likely, but probable where there are other people present in an area. Best practise will require sanitizing of all surfaces once the person/people have left the area - such as in offices, places of worship, at sales counters and collection points to name a few.

For additional information, see the Material Safety Data Sheet, which is available on request.
