

Anti-Microbial Hand Sanitizer 19-20

Triple Protection

Our Hand Sanitizer 19-20 is formulated with 70% Alcohol, Glycerine and Benzalkonium Chloride. Offering triple protection and residual anti-microbial properties once the alcohol has evaporated.

Fast acting

Immediately effective and relatively fast evaporating.

Safe

Non-Toxic, Non-Corrosive, Non-Staining, Non-Irritant, Non-Carcinogenic and Biodegradable. Contains no Phenol, Chlorine or Aldehyde.

Moisturiser

The product has a natural emollient that leaves the skin feeling smooth and not dry.

Residual action

Contains ingredients that continue to protect the skin after the alcohol has evaporated.

Slight gel consistency

This ensures full delivery of all the ingredients to the skin's surface, with negligible aerosol loss when sprayed.

Non sticky

Hands are left smooth, soft and tack free which stops dirt and dust sticking to the surface of your hands.

Synergistic action

The combination of the partial gel, 70% Alcohol content, Glycerine and the residual Benzalkonium Chloride in synergy gives effective anti-microbial protection.

Updated formulation - 70% alcohol

To meet current requests from our customers we have increased the alcohol percentage of our HS19-20 from 60% to 70%.

As pure alcohol (100%) evaporates too quickly, it does not have sufficient dwell time on the skin to effectively work. An effective formulation requires sufficient water to slow down the evaporation rate of the alcohol, thereby increasing the dwell time on your skin.

Our original formulation contains 60% alcohol, which is globally recommended as being effective in killing viruses and other pathogens. This is formulated to be gentler on your skin in the longterm without compromising the efficacy of the product. 60% is available on request.

Active Ingredients & Purpose

70% Alcohol, 0.1% Benzalkonium Chloride
Antiseptic handwash with residual anti-microbial action.

Ingredients

Aqua, Alcohol, Glycerine, Propylene Glycol, TEA, Carbopol, Benzalkonium Chloride.

Uses

Sanitizes hands to eradicate or control microbial activity on the skin.

Do not use

On face or in eyes, or on open wounds and cuts.

Warnings

Keep out of reach of children.

For external use only. Do not swallow or ingest.

If swallowed, get medical help or contact a poison information centre immediately.

Flammable - keep away from naked flame.

When using this product

If in eyes, rinse promptly and thoroughly with water.

Discontinue use if skin irritation or redness occurs.

Directions

Spray into the palm of one hand, rub all over the surfaces of your hands (back & front) - until your hands are dry.

Other information

THIS PRODUCT IS NOT A SUBSTITUTE FOR HAND WASHING WITH SOAP AND WATER (20 seconds).
